Mineral Resources and Mining Education Tours

The Tours provide opportunities for Formal and Informal Educators and Mineral Development Advisers from across Canada to learn about Earth sciences, mineral resources and mining, including the mine life cycle, sustainability, and careers.

The tours are sponsored and available for a fee of \$50, per tour. Registration includes transportation, accommodation and meals. Participants are responsible for expenses associated with travel to and from tour locations.

August 13-17

Foundations Tour

Join us at the Canadian Ecology Centre and in North Bay for a program that focuses on providing a foundational understanding of Earth science and mineral resources.

- Participate in workshops to learn Earth science and mineral resources fundamentals and about hands on learning activities for classroom teaching.
- Tour geological sites of interest in Timmins and North Bay
- Participate in field trips to mineral exploration and mining supply and service companies
- Engage with industry representatives to learn about careers

August 20-24

Mine Life Cycle Tour

Join us at the Canadian Ecology Centre and in Timmins for a program that focuses on the phases of the mineral resource development cycle, from start to finish.

- Go underground in an operating mine!
- Tour reclaimed mine sites
- Tour geological sites of interest in Timmins and North Bay
- Visit mine service supply companies in North Bay.
- Participate in Earth science instructional development workshops, to learn about resources for classroom teaching
- Engage with industry representatives to learn about careers
